Re: *New Cartridge Release Powertrain 2005*

Part # BXBD32052
Powertrain 2005
Release date December 6, 2006

A new cartridge release is available: "Powertrain 2005". The new part # is BXBD32052.

This release is the latest in the Powertrain series and includes everything previously in "Powertrain 2004" plus the addition of 2005 engine and transmission OE enhanced diagnostic coverage for GM, Ford and Chrysler plus complete generic OBDII.

Customers who have not previously purchased a "Powertrain" cartridge before will also need to buy the CAN-Key hardware adapter (part # BACN30091) for communication with CAN equipped vehicles.

An affordable update option for owners of "Powertrain 2004" is our CD update (order part # BXBD32052A). You will receive an update CD and new cartridge label. Required is a PC with 9pin serial port and RS-232 cable which was supplied with all BDM kits.
